GROUP

Stronger

Lighter

Smaller

Greener

More Powerful

The *next* great RV air conditioner.

BRISK II

Dometic engineers have spent two years completely redesigning and reengineering one of the most popular and most imitated RV air conditioners.

WELCOME TO THE ALL-NEW ...

BRISK II

A Revolution in RV A/C Technology!

Cooler... stronger... quieter... lighter... the Brisk II puts it all together for an all-new, best-in-class RV A/C, starting with 15 percent increased air flow and improved cooling capacity!

Reengineered where it matters

Heavy-duty motor support brackets, reinforced mounting screw holes, and thick structural EPP foam housings all help create a sturdier, more reliable A/C unit. The compressor and motor are mounted with rubber isolation pads and grommets to reduce vibration.

Hi-tech materials

Used by automotive and aircraft engineers, EPP (Expanded Polypropylene) foam makes Brisk II lighter, better insulated, and more aerodynamic, while adding structural integrity and reducing noise and vibration.

Durable design

SLEEK SHROUD

Sleek new shroud offers better ventilation, more strength and superior aerodynamic performance.

ALL-NEW BASE PAN

Three-inch deep-drawn G90 carbon steel has an extra smooth powder-coated finish for long-lasting durability against rust and corrosion.

Ten percent greater strength and rigidity is achieved through a heavier gauge metal pan with ribbed areas and reinforced vent holes. More platform stability adds to the life cycle.

More structure, less weight.

29.18 INCHES

27.23 INCHES

Tighter tolerances, more air.

Smart design

SMALLER CARBON FOOTPRINT

Smart design, tighter specification allowances, and improved materials create energy efficiencies that reduce operating costs and environmental footprint while improving fit and finish.

High performance

BENCHMARK TESTING

Rigorously tested to confirm it outperforms every competitor in all significant parameters, Brisk II is best-in-class of any standard rooftop A/C for weight, air flow and capacity for RVs.

COLD-SHOT™ TECHNOLOGY

New air distribution box and return air grill incorporate exclusive Cold Shot™ technology that temporarily circumvents the RV's air duct to deliver a sturdy blast of cold air directly into the immediate interior and optimize air flow and capacity.

ADVANCED COIL DESIGN

Hydrophilic Coating on coils enhances high performance and protects against corrosion in high temperatures.

QUIETER TOO!

High performance motor with sound dampening bracket design turns down the buzz.

EASY INSTALLATION, MAINTENANCE

Just four fasteners allow for quick and easy shroud removal. Top-mount installation and maintenance is quicker and easier.

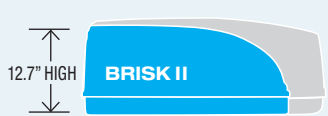

Innovation

Great things really do come in small (sleek) packages.

**SMALLER
FOOTPRINT**

SLEEKER DESIGN

19%

**LIGHTER WEIGHT THAN
OTHER A/Cs IN CLASS**

Advanced Climate Control

Air Distribution Box **NEW**

- Exclusive Cold Shot® technology
- Five multi-directional air slots
- Ratcheting side vents
- Washable Hepa-style filters

Return Air Grill **NEW**

- Exclusive Cold Shot® technology
- Washable filter: Hepa-style
- Low profile

Quietzone™ Compatible

- Brisk II model works with the Quietzone ducted air system

Quietzone™

Single Zone LCD Thermostat

- Simple, three-button operation
- Easy control for cool/furnace, heat pump or heat strips
- Low profile
- Manual or automatic control
- Large display screen

Comfort Control Center II

- Fully digital operation
- Large, low profile SMX bluelight display
- Industry first, real time-of-day, area-independent programming
- Easily controls rooftop A/C, heat pump, furnace, heat strip, hydronic heating system or Automatic Generator Start (AGS)

BRISK II

FEATURES	B57915	B59516
Nominal capacity, BTU/hr.	13,500	15,000
Installation type	Non-ducted or Ducted	Non-ducted or Ducted
Electrical rating	115V AC, 60Hz, 1Ph	115V AC, 60Hz, 1Ph
Compressor-rated load amps	12.4	13.2
Fan motor-rated load amps	2.7	2.7
SCFM, high-speed max./min.	300/350	300/350
Heater amps/watts @ 120VAC	13.7/1,530	13.7/1,530
Refrigerant 410A (oz.)	16	22
Minimum wire size	12AWG copper up to 24 feet. For distances over 24 feet consult the National Electrical Code.	
AC circuit protection	(User Supplied) 20 amp time delay fuse or 20 HCAR circuit breaker	
DC circuit protection	(User Supplied) Installation must comply with national, state, provincial and/or local electrical codes	
Installed weight, lbs.	72	74
Minimum generator size - 1 unit	3.5 KW	3.5 KW
Minimum generator size - 2 units	5.0 KW	5.0 KW
Thermostat/Control options	ADB or Thermostat	ADB or Thermostat

Outstanding Warranty

Dometic's 2-Year Protection Plus warranty.
