

Stable Stix

Making Life
Easier

Tired of the camper shaking every time you move? Stable-Stix is the fix!

Truck Campers sway as they sit on their jacks. It doesn't matter how big or heavy the camper is. Every single move you make, causes a rolling effect. No-one wants to bring extra bottle jacks and blocks of wood for added stability. Where are you going to put all that stuff?

Other products force you to remove your camper from the truck in order to use their product. Not with Stable-Stix. Rieco Titan knows you don't always want to spend all that time backing in and out from underneath the camper. In minutes, even with the camper on the truck, you'll have a shake free night.

Are you afraid of tipping over the camper while you're in bed and the camper is on the jacks?

No more worries with **Stable-Stix**.

- Strong square steel tubing.
- Telescoping tubes allow for compact storage.
- Easy set up. Two minutes and you're done.
- Adjust from 68"-86".
- Durable powder coat paint for a long beautiful life.
- Proudly American built here in the USA.
