Quick Drop 6" Footpad
Adds 5.5" Of Extension

TESTED
TOUGH

The Future Is Here!

Introducing the all-new Phoenix Electric Tongue Jack. It's the newest innovation from Ultra-Fab and it's now the fastest electric tongue jack on the market.

Ultra-Fab's engineers developed the Phoenix with ball screw technology. Meaning, instead of raising and lowering the jack with Acme threaded rods, the Phoenix incorporates a strong threaded steel rod with ball bearings.

In the same tradition of Ultra-Fab's existing line of high-quality and durable tongue jacks—proven the most reliable in independent lab tests compared to all other brands of electric tongue jacks—the Phoenix adds greater speed of operation with the new technology.

The Phoenix is rated for 4,000 pounds lifting capacity. It also features a stronger motor, an electronic control panel, a built in light for night operation and an emergency crank access port with a crank socket included. In addition, it does not have external switches that might break off.

So, yes, the future is here! And, you can become part of the future the next time you are in the market for an electric tongue jack. Just say "make mine the Phoenix!"
