

No matter where the road takes you, breathe easy with a MERV 6 AC filter by RV Air!

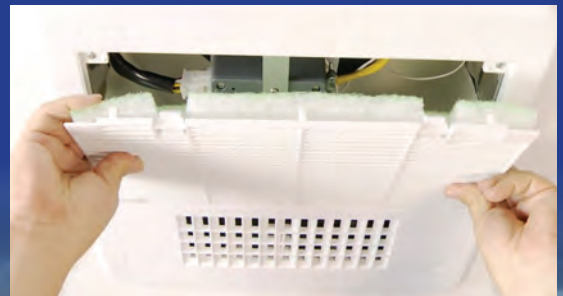

A BETTER FILTER

When it comes to standard RV AC filters—they stink! They do very little to stop dust, and don't filter allergens or other air pollutants. RV Air filters are made from an unwoven, antimicrobial polyester that stop airborne particles as small as 3 to 10 microns. This cleans the air in your RV better than ever before.

EASY TO INSTALL

Remove your AC filter grille, replace the old filter with your RV Air filter **GREEN SIDE UP** and reinstall the grille on your AC unit.

18-5203
AC 101G
 COLEMAN OEM SURE CUT
